The Florida Society of Neurology is pleased to present the 45th Anniversary of the Annual Meeting of the Florida Society of Neurology in Orlando, Florida, September 20-22, 2013, at The Peabody Orlando. This conference will be held in conjunction with the Third Annual CME Meeting of the Southern Headache Society. This program is a three day conference with four educational tracks:

39th Annual Course in Neuropsychology and Behavioral Neurology:
Cognitive Rehabilitation

Advances in Neurology: Neurology for Special Populations
(8th Annual Research Day)

Neurology for the Non-Neurologist: Neurology with Other Medical Fields

The Third Annual CME Meeting of the Southern Headache Society:
Headache 2013

LEARNING OBJECTIVES

At the conclusion of this session, participants will have received current information on a diversity of medical topics pertinent to patient care in Neurology. Subject matter was chosen based upon assessed needs, future trends, and relevance to patient care. Many topics were chosen as a direct result of the evaluations from last year's program, the planning committee for the behavioral course, the education workgroup of the Florida Society of Neurology, and the board of the Florida Society of Neurology. At the end of the three parallel sessions:

- The neurologist will be updated and will acquire the necessary skills to perform procedures needed in today's practice of neurology, such as EMG, polysomnology, and chemodenervation.
- The general practitioner will know how to recognize, localize, and treat common neurological disorders, and gain exposure to the essential neurologic exam and the cognitive examination for high brain function.
- The behavioral specialist will be updated with the most recent research advances to cognitive changes in traumatic brain injury.
- The neurologist-in-training will have further developed the skills of analytical thinking and appreciate the value of life-long learning, our yearly goal.
